

Project Management As A Service (PMaaS)

Elire's Project Managers strive to introduce a standardized and consistent framework into Client projects. Our Project Managers provide a robust set of industry-leading project tools and templates to help align project delivery outcomes across all areas, achieving greater project success.

- Leverage an Elire Project Manager to**
 - ✓ Increase the likelihood a project will be successful and produce the desired outcome
 - ✓ Decrease risk by avoiding scope creep, missing timelines, and/or budget issues
 - ✓ Establish governance and reporting structure

Project management guidance

Elire assists clients on smaller projects that may need additional guidance throughout the project life cycle.

Part-time project management support

Elire works side-by-side with clients to co-manage project activities including processes, procedures, documentation, and other tasks or deliverables.

Full-time project management support

Elire assumes responsibility for project management and directs all PMO activities.

Project Management Services

Intergrates project specific methodology	✓	✓	*Optional
Establishes project governance	✓	✓	*Optional
Implements communication approach and reporting structure	✓	✓	*Optional
Directs overall project to ensure successful and timely completion	✓		

**Hours determined per contract*

Additional services

Tools and templates only – provides access to Elire proprietary project management tools and templates to assist clients with managing their projects in-house.

Project health checks – provide an objective review of our Client's current project state as well as findings report for client leadership. Findings will highlight areas that are already achieving success and any target areas that require support. Objective health checks are great for complex mid-to-large size projects that require stakeholder oversight and/or board level review.

***All three PMaaS strategies can be customized to fit projects of any size within any industry*
