

Elire Strategic Roadmap

Is your business struggling with a major decision?

Imperfect information can prevent organizations from making a decision about the correct course of action. Even when a course is selected, the lack of stakeholder buy-in or a strong business case can create barriers to execution. All of this can cause organizations to be trapped within the current state and unable to achieve their desired future state. Elire's Strategic Roadmap will develop a vision for the future that can be executed with confidence by engaging subject matter experts within your organization to build and eliminate costly rework by avoiding the pitfalls of jumping straight into solutioning.

Elire will guide you through each phase along the way to making the best decision for your organization.

Mobilization kicks off the project by identifying what decision(s) need to be made and which business processes are in scope

Disconnect Assessment allows you to efficiently document the process today & any disconnects (anything that impedes the effectiveness or efficiency)

Review & Validation will remove barriers by ensuring the information you've collected is complete and accurate, while strengthening support within the team(s)

Vision & Strategy is where we will work with your team to provide best practice & tailored solutions to your organization's disconnects, developing a strong business case for metric driven change.
