

Process Tools Training

Every organization is different and so are the solutions to your problems. That is why Elire teaches our proven tools based process improvement methodology to provide your team the skills to solve any problem.

Elire will teach your team basic process improvement tools to initiate or sustain process improvement efforts within your organization.

4 Days of classroom led training with up to 12 participants learning a flexible framework that will allow them to take on virtually any process improvement initiative, big or small.

5 Phases of Process Improvement

Mobilization
will help you gain alignment and have productive sessions

Leading Practices
provides the tools to conduct research so you can develop a complete solution

Current State Assessment
allows you to efficiently document and tie metrics to how the work is done today

Vision & Strategy
is the phase in which participants develop solutions and a structured business case

Designing the Future State
brings together the information from all the phases to create the blueprints to execute their vision

Throughout the 5 phases, participants will go through workshops that allow them to practice the tools in breakout sessions with their peers.
