

Open Imaging Integration

Overwhelmed and exhausted by manual Accounts Payable Processes?

Many organizations continue to utilize fragmented, paper intensive processes for processing of their Accounts Payable invoices. Leveraging PeopleSoft 9.2's new Open Imaging Integration (OII), the AP Automation Solution from Canon Information and Imaging Solution (CIIS) can streamline your entire AP Process, from receipt to imaging, approval, and through payment. Combining the power of PeopleSoft, Optical Character Recognition (OCR) and AP Best Practices, Elire experts are here to help you optimize your AP Operations.

Solution Benefit Highlights

Elire's deep PeopleSoft and business process expertise, combined with Canon's AP Automation Solution can provide your organization with:

- ✓ **A digital, transparent AP Process** - removing manual keying of invoices allows for faster processing and greater traceability to your invoicing process
- ✓ **Flexibility** - AP Automation Solution provides flexibility, allowing you to code and approve invoices at different points, based on your organization's workflow needs. This allows you to leverage existing ERP Workflow without rebuilding it
- ✓ **Longevity** - a solution built for growth; with intelligent learning capabilities, allowing you to maximize your ERP investments
- ✓ **PUM Friendly** - The Accounts Payable Automation Solution by Canon, based on Open Imaging Integration, has been granted an Oracle Validated Integration with PeopleSoft 9.2

Elire and Canon Differentiators

- ✓ **Your Trusted PeopleSoft Advisor, Elire** - Elire consultants average 20 years of experience providing strategic guidance and implementation services to unlock the potential of software investments
- ✓ **The Canon brand you trust** - The AP Automation Solution by Canon leverages Canon's world-class imaging technologies and business process expertise
- ✓ **An Established Partnership** - Elire and Canon will utilize best practices and lessons learned from previous successful implementations
